**ARTICLE V
SERVICE FEE**

- 5.1 **Explanation.** NCTCOG will make this Master Service Agreement available to other governmental entities, Participating Entities, and non-profit agencies in Texas and the rest of the United States through its SHARE cooperative purchasing program. The Contractor is able to market the Services under this Agreement to any Participating Entity with emphasis that competitive solicitation is not required when the Participating Entity purchases off of a cooperative purchasing program such as SHARE. However, each Participating Entity will make the decision that it feels is in compliance with its own purchasing requirements. The Contractor realizes substantial efficiencies through their ability to offer pricing through the SHARE Cooperative and that will increase the sales opportunities as well as reduce the need to repeatedly respond to Participating Entities' Requests for Proposals. From these efficiencies, Contractor will pay an administrative fee to SHARE calculated as a percentage of sales processed through the SHARE Master Services Agreement. This administrative fee is not an added cost to SHARE participants. This administrative fee covers the costs of solicitation of the contract, marketing and facilitation, as well as offsets expenses incurred by SHARE.
- 5.2 **Administrative Fee.** NCTCOG will utilize an administrative fee, in the form of a percent of cost that will apply to all contracts between awarded contractor and NCTCOG or participants resulting from this solicitation. The administrative fee will be remitted by the contractor to NCTCOG on a quarterly basis, along with required quarterly reporting. The remuneration fee for this program will be 2% on sales.
- 5.3 **Setup and Implementation.** NCTCOG will provide instruction and guidance as needed to the Contractor to assist in maximizing mutual benefits from marketing these Services through the SHARE purchasing program.

**ARTICLE VI
RELATIONSHIP BETWEEN THE PARTIES**

- 6.1 **Contractual Relationship.** It is understood and agreed that the relationship described in this Agreement between the Parties is contractual in nature and is not to be construed to create a partnership or joint venture or agency relationship between the parties. Neither party shall have the right to act on behalf of the other except as expressly set forth in this Agreement. Contractor will be solely responsible for and will pay all taxes related to the receipt of payments hereunder and shall give reasonable proof and supporting documents, if reasonably requested, to verify the payment of such taxes. No Contractor personnel shall obtain the status of or otherwise be considered an employee of NCTCOG or Participating Entity by virtue of their activities under this Agreement.

**ARTICLE VII

7.1 Representations and Warranties. Contractor represents and warrants that:

Contractor shall have the right to retain copies of documentation, and other items for its archives. If for any reason the foregoing Agreement regarding the ownership of documentation is determined to be unenforceable, either in whole or in part, the Contractor hereby assigns and agrees to assign to NCTCOG all rights, title, and interest that the Contractor may have or at any time acquire in said documentation and other materials, provided that the Contractor has been paid the aforesaid.

**APPENDIX A
Statement of Work**

The Contractor shall supplement existing SHARE Member procurement personnel in procuring desired goods and/or services. A list of anticipated services to be provided and expectations of TXShare’s Road and Highway Asset Management Software are detailed, below.

The following selection of anticipated procurement tasks is **not all-encompassing**, and additional procurement related tasks may be requested by SHARE Members; if desired.

The envisioned software will possess the following capabilities:

- 1) Comprehensive visual documentation and identification of damage to roads.
- 2) Automated cataloging and identification of damage of assets, including, but not limited to, manholes, street-signs, and catch-basins.
- 3) Software recommendations on where road improvements should be prioritized.
- 4) Enable the user to manually collect and easily communicate and export data.
- 5) Be flexible and interoperable to work with other software currently deployed by TxShare Member Entity (Geographic Information Systems, work-order software).

- A.1 Platform:** The software shall be available through a combination of native mobile applications as well as a web-based application, accessible from any network connected computer.
- A.2 Collection of Data:** Software will incorporate the ability to collect data using only a mobile device. The software will be able to analyze the data through use of the mobile tablet/peripheral/phone’s camera, photographing the right-of-way while mounted on the windshield of a municipal vehicle.
- A.3 Manual Collection of Data:** The mobile application shall enable the user to safely document the right of way without the user having to stop the vehicle and/or remove their hands from the steering wheel.
- A.4 Artificial Intelligence:** The software will utilize Artificial Intelligence to independently detect and classify damage within the surface of the roadway.
The Artificial Intelligence component shall have the capability to identify if there is existing damage to the asset while notifying the user of potential safety hazards.
- A.5 Artificial Intelligence for Pavement Condition Assessments:** The software shall capture images of the road and the right-of-way and identify and classify all damage with the surface of the road. The software must utilize an established assessment methodology that provides objective scoring to the rating of its road network. The software shall enable the user to toggle between various established pavement condition rating models, such as EMI, PCI, and PASER scoring.
- A.6 Artificial Intelligence for Asset Management: Street Signs**
Utilizing the photographs referenced in A.5, the AI should include technology to identify all the TxShare Member Entity’s street-signs within the right-of-way. The software should assign each street-sign with an ID number so that the TxShare Member Entity can begin to manage the street-sign through the software’s web application.

Artificial Intelligence shall also be able to identify if the street signs are damaged.

- A.7 Artificial Intelligence for Asset Management: Catch-Basins**

Utilizing the same photographs referenced in A.5, the AI shall also be able to identify all catch-basins within the right-of-way. The software should assign each catch-basin with an ID number so that the TxShare Member Entity can begin to manage the catch-basin through the software's web application.

Artificial Intelligence shall also be able to identify if the catch-basin is lowered or outslipping, relative to the surface of the pavement.

A.8 Artificial Intelligence for Asset Management: Manholes

Utilizing the same photographs referenced in A.5, the AI must also be able to identify all manholes within the surface of the pavement. The software should assign each manhole with an ID number so that the TxShare Member Entity can begin to manage the catch-basin through the software's web application.

Artificial Intelligence shall also be able to identify if the manhole is lowered or outsticking, relative to the surface of the pavement.

A.9 Web Application for Management of Data

For management of data, the TxShare Member Entity shall be granted remote access to a web application to view the images and data collected. This web application will include the following functionality:

- Pavement Condition Module
- Construction Planning Module
- Asset Management Module
- Asset Based Task Management Module
- GPS Tracking Module
- Road Safety Alerts Module

A.9.1 Pavement Condition Module (PCM)

The Pavement Condition Module will enable the TxShare Member Entity to identify, on a granular level, the class and severity of damage that exists across the road network. The PCM will enable the user to view each individual photograph of the right-of-way recorded by the mobile device.

Color Coded Scoring + Grading: Each Point and Segment should also be color-coded, based on its condition, that will enable the TxShare Member Entity to quickly visualize and identify areas of critical need. The module will enable the TxShare Member Entity to filter and visualize the number of road miles that fall within each grading.

Road Class: The PCM will enable the TxShare Member Entity to filter for different classes of road including, but not limited to:

- Motorways
- Trunk Roads
- Residential Roads
- Country Lanes

Surface Type: The PCM will enable the TxShare Member Entity to filter for different surfaces of road.

Distress Type: The PCM will enable the TxShare Member Entity to filter for different classifications of road distress including, but not limited to:

- Potholes
- Cracking
- Joint / Seam Failure (Longitudinal Cracking)
- Damaged Patching
- Poor Ride Quality

In addition to filtering for distress type, the PCM shall also enable the user to filter based on pavement condition rating, both to the individual Geo-coordinate and to each overall segment.

Reconstruction Suggestions: The PCM shall also assist the TxShare Member Entity with identifying segments that are in immediate need of specific treatments. The PCM will suggest segments that need reconstruction, based on the following treatment proposals:

- Pavement Outburst Treatments
- Crack and Seam Sealing
- Segment Surface Renewal
- Full Segment Renewal

A.9.2 Construction Planning Module (CPM)

The software shall contain a module that will enable the TxShare Member Entity to streamline planning, design, and execution phases of road rehabilitation projects. The software should include functionality that assist engineers, planners, and project managers in efficiently managing capital improvement:

Design and Planning - This shall include data related to:

- Costs
- Treatment Categories
- Construction Scheduling and Timelines
- Contractors
- Life Extension

Cost Estimation and Budgeting - Functions for estimating project costs, including materials, labor, and equipment, and managing budgets throughout the project lifecycle. To help the TxShare Member Entity maximize budget and workforce efficiency, the module shall also provide data related to budget efficiency, which shall look to compute areas of over/under spending based on damage to the road network.

A.9.3 Asset Based Task Management Module

The software shall contain a module featuring a customization to manage all assets. This envisions the ability to utilize the module as an active Geographic Information System and to allow for management of road maintenance tasks.

Task Management: The Task Management portion of the Asset Management module shall include the ability to manage tasks such as:

- Rapidly create a task related to an asset or any miscellaneous photograph.
- Label and prioritize the task.
- Digitally assign the task to a team-member
- Digitally assign a due date, including the ability to create a recurring task.
- Task Notifications, including system alerts for tasks that are overdue.

A.9.4 GPS Tracking Module

The software shall have a separate module that tracks movement of all TxShare Member Entity employees who are using the software.

A.9.5 Road Safety Alerts Module

The software shall include a module that enables the TxShare Member Entity to respond to more rapidly to:

- Critical damage within the surface of the pavement
- Critical damage to assets that pose risk to drivers, bikers, and pedestrians.

A.10 Sharing of Data: Emails, Printing, Excels, Interoperability

The web application must include the functionality to seamlessly share data using other basic forms of data and sharing management used by the TxShare Member Entity.

- The web application shall include functionality to directly generate and send data, photographs, and even tasks, via email.

Section 319 of Public Law 101-121 prohibits recipients of federal contracts, grants, and loans exceeding \$100,000 at any tier under a federal contract from using appropriated funds for lobbying the Executive or Legislative Branches of the federal government in connection with a specific contract, grant, or loan. Section 319 also requires each person who requests or receives a federal contract or grant in excess of \$100,000 to disclose lobbying.

No appropriated funds may be expended by the recipient of a federal contract, loan, or cooperative agreement to pay any person for influencing or attempting to influence an officer or employee of any federal executive department or agency as well as any independent regulatory commission or government corporation, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with any of the following covered federal actions: the awarding of any federal contract, the making of any federal grant, the making of any federal loan the entering into of any cooperative agreement and the extension, continuation, renewal, amendment, or modification of any federal contract, grant, loan, or cooperative agreement.

As a recipient of a federal grant exceeding \$100,000, NCTCOG requires its subcontractors of that grant to file a certification, set forth in Appendix B.1, that neither the agency nor its employees have made, or will make, any payment prohibited by the preceding paragraph.

Subcontractors are also required to file with NCTCOG a disclosure form, set forth in Appendix B.2, if the subcontractor or its employees have made or have agreed to make any payment using nonappropriated funds (to include profits from any federal action), which would be prohibited if paid for with appropriated funds.
