

LAWS SYSTEMS

Proposal for Public Alerting Solutions

Summary

LAWS Systems provides next-generation public safety alerting solutions designed for cities seeking modern, scalable, and effective alternatives to traditional warning sirens. Our system combines quality and innovation to deliver automated, reliable, and cost-effective alerting without the infrastructure burden of legacy systems.

This proposal outlines the recommended configurations and pricing for LAWS Systems' solutions for both the LAWS® 1200S Geo – Stationary & LAWS® 1200M Geo – Mobile systems.

System Overview

LAWS Systems units are self-contained alerting devices equipped with:

- Reliable connectivity to multiple alert and data sources
- Highly intelligible, high volume voice alerts
- Remote cloud-based control and monitoring
- LED beacons for visual alerts
- Emergency services radio for live public address
- Battery backup and available solar power option

Each unit is built for long-term reliability with quick, easy installation and maintenance, minimizing infrastructure costs and maximizing operational uptime.

Pricing Summary

The following provides a description of each line item and what is included or excluded for budgeting purposes:

Hardware - Includes the core components of the LAWS alerting system:

- LAWS 1200S Geo Controller
- Siren assembly, including drivers, horns, and mounting fixture
- Visual beacons integrated into the mounting fixture
- Enclosure with all systems integrated, additional battery capacity, shore power connection
- Not Included: Emergency Services Radio Receiver (installation into the system included)

Subscription - Covers digital services and connectivity to operate the system:

- Automated activation for NWS polygon-based and lightning alerts
- Remote activation and configuration via the LAWS Systems web portal
- Cellular data connectivity for each controller
- Updates to firmware and software of all systems and users

LAWS® 1200S Geo – Stationary

A Geo-Specific, stationary outdoor warning system with cellular connectivity

Pricing with Volume Break Points and Discounts

LAWS® 1200S Geo	Unit Price*	5+
Hardware Controller, Sirens, and Beacons	\$ 19,900	5%
Subscription (Annual) Per Unit	\$ 600/yr.	5%

LAWS® 1200M Geo – Mobile

A Geo-Specific, mobile trailer outdoor warning system with cellular connectivity

Pricing with Volume Break Points and Discounts

LAWS® 1200M Geo	Unit Price*	3+
Hardware Controller, Trailer, Sirens, and Beacons	\$ 40,000	3%
Subscription (Annual) Per Unit	\$ 600/yr.	5%

Additional Benefits and Options

Software Updates – Included with current subscription

Warranty and Support – Included for 1 year (or at least 1 full “storm season”)

* Listed prices represent standard rates and do not account for any applicable cooperative, contractual, or other discounts that may apply.

Next Steps

This proposal is provided for budgetary evaluation purposes only. A site assessment and scope alignment discussion can be scheduled at your convenience to provide a detailed, binding quote.
