NTX Sandblasting LLC (DBA Texas Sandblasting) Bid for Fire Hydrant Painting & Ancillary Services RFP # 2024-133 to Laser clean to remove all old paint and corrosion from fire hydrants then prime and paint them per specs. The laser cleaning is much less intrusive and much quieter than traditional abrasive blasting which will make the local residents happier. In addition, to the benefits listed below.

Precision: laser cleaning allows for targeted removal of contaminants without affecting the underlying substrate.

Minimal Waste: Unlike sandblasting, which generates a significant amount of waste material, laser cleaning produces little to no debris, reducing cleanup efforts

Environmentally Friendly: Laser cleaning typically uses no chemicals or abrasive materials, making it a more environmentally friendly option.

Versatility: Lasers can be adjusted for various materials and types of contamination, providing flexibility for different cleaning tasks.

Safety: With less airborne dust and fewer harmful particles, laser cleaning can provide a safer working environment for operators and pedestrians.

Less Invasive- Being less invasive it minimizes the disruption to daily operation and function of the city and its residents.

NTX Sandblasting LLC Laser cleaned 3500 linear feet of 2.5" pipe for Texas Instrument in Sherman for their new facility. We ended up using the laser cleaning process because there were too many contractors onsite and we couldn't shut down the site to abrasive blast the pipe. The laser kept the job on schedule on time and the painters could paint right next to the laser. This is something that would have been very difficult with traditional blasting.

The Stonhard Group:

Chris Davis 979-255-1688

Email: cdavis@stonhard.com

NTX Sandblasting LLC blasted the interior of Midwestern State University in Wichita Falls TX. The crew blasted and removed all the failing coating in each cell in the cooling tower.

We are working on a chemical storage tank for Stonhard at BELL Helicopter as we speak. The crew enters through a manhole on the side of the tank and blast all the metal walls to “white metal” finish so the painters can come in and start the coating process.

The City of Lewisville

Malcom Texeria 972-815-7329

We blasted all the city's salt trucks and hoppers that had heavy corrosion and failing paint. After we blasted all the trucks we painted the hoppers with a 2-part epoxy coating.
