ARTICLE V SERVICE FEE

- 5.1 **Explanation.** NCTCOG will make this Master Service Agreement available to other governmental entities, Participating Entities, and non-profit agencies in Texas and the rest of the United States through its SHARE cooperative purchasing program. The Contractor is able to market the Services under this Agreement to any Participating Entity with emphasis that competitive solicitation is not required when the Participating Entity purchases off of a cooperative purchasing program such as SHARE. However, each Participating Entity will make the decision that it feels is in compliance with its own purchasing requirements. The Contractor realizes substantial efficiencies through their ability to offer pricing through the SHARE Cooperative and that will increase the sales opportunities as well as reduce the need to repeatedly respond to Participating Entities' Requests for Proposals. From these efficiencies, Contractor will pay an administrative fee to SHARE calculated as a percentage of sales processed through the SHARE Master Services Agreement. This administrative fee is not an added cost to SHARE participants. This administrative fee covers the costs of solicitation of the contract, marketing and facilitation, as well as offsets expenses incurred by SHARE.

5.2 Administrative Fee. NCTCOG will utilize an administrative fee, in the form of a percent of cost that will apply to all contracts between awarded contractor and NCTCOG or participants resulting from this solicitation. The administrative fee will be remitted by the contractor to Civic Marketplace on a quarterly basis, along with required quarterly reporting. The remuneration fee for this program will be 2.5% on sales.

5.3 Setup and Implementation. NCTCOG will provide instruction and guidance as needed to the Contractor to assist in maximizing mutual benefits from marketing these Services through the SHARE purchasing program.

TECHNICAL APPROACH

Our agile-based project management methodology has been refined over the years, ensuring flexibility and responsiveness throughout the project lifecycle. We work closely with clients as an integral part of their team, designing a customized project plan outlining key responsibilities, milestones, and deadlines. This plan, developed in collaboration with the client, ensures transparency and clarity. Any changes to the approved scope of work will be reflected in the project's cost, allowing complete visibility into budget adjustments.

Each client is assigned a dedicated Project Manager, who oversees the project's critical path and acts as the primary point of contact. This manager ensures that all aspects of the project are understood, progress is carefully monitored, and any issues are quickly addressed. By identifying root causes early on and collaborating with the team, we develop effective solutions to keep the project on track. To streamline the workflow, we use Teamwork, a collaborative project management tool that provides real-time visibility into schedules, budgets, assets, and team workloads. This platform lets clients stay informed, review documents, and track communications and project success, ensuring full transparency and smooth project delivery.

For every project, we prioritize clear communication between clients and our development team to keep tasks aligned and progress on track. We follow a rigorous quality assurance process, including extensive testing, with detailed reports provided to clients as needed. Our team adheres to industry standards, leveraging best practices for compliance and utilizing AWS when appropriate. During deployment, we allocate dedicated time to ensure smooth transitions, responding swiftly to any issues. After deployment, we maintain regular follow-ups to ensure the solution's continued integrity, offering suggestions for improvements to further enhance functionality and efficiency.

KEY PERFORMANCE INDICATORS (KPI)

Below is a list of potential deliverables that will be given to the client(s) in the event that they apply to the project. These potential deliverables give a tangible and measurable report of the status and performance of our team and solutions.

1. ACCURACY

- **Testing & Validation Reports**
Reports of tests throughout the project, ensuring consistent progress.
- **Research/Audit Logs**
Logs are kept and communicated to the client if research is necessary to complete a project, ensuring a clear understanding of both sides of the project.

2. RELIABILITY

- **Security Reports**
Our professionally created cybersecurity and data retention reports in the event AWS is used for data security purposes.
- **System Load Testing Results**
Documentation of performance tests and results showing the system's ability to handle peak loads or unexpected traffic spikes.
- **Backup & Disaster Recovery Plan**
A written plan and corresponding procedures that describe how the system will recover from failures, including regular backups and failover processes. If AWS is used, this plan (or part of the plan) will likely be found in the cybersecurity reports regarding the site's backups.

3. INNOVATION/DATA AFTER THE LAUNCH

- **Post-Launch Analytics Dashboard**
A dynamic dashboard that aggregates key performance indicators (KPIs) post-launch, such as user engagement, system performance, and error rates, allowing teams to spot trends and adjust accordingly.
- **User Feedback Reports**
A report summarizing feedback from users regarding the product's features, performance, and any innovative aspects that users appreciate or wish to see improved. This can be gathered via surveys or usage analytics.
- **Feature Requests Backlog**
A prioritized list of feature enhancements or new ideas emerged from user feedback or internal brainstorming sessions post-launch, showing a commitment to innovation.

RISK MANAGEMENT

While each project has unique challenges and solutions, we can list common risks alongside our risk mitigation strategies. Rest assured that here at 'corePHP', we have resolved and mitigated many unique risks throughout our vast multitude of projects.

MAJOR CHANGE REQUESTS

If a client requests a major change, we strive to integrate it into the project while minimizing technical debt. This approach often results in greater long-term savings compared to prioritizing the lowest immediate cost, while always ensuring a more reliable and modular product. If the change cannot be implemented immediately or within the existing project scope, we typically propose it as a separate, peripheral project.

INTERNAL API GOING DOWN

Historically, our APIs for AI-related projects will not “go down” unless the project is being modified or the entire application experiences downtime. In each scenario, we will already have a plan to bring it back online.

THIRD-PARTY API GOING DOWN

These types of issues are extremely rare and typically resolve themselves within minutes. If a client wants to avoid this entirely, we will gladly provide custom development options that do not rely on a third-party API.

UNAUTHORIZED ACCESS (HACK)

While this is highly unlikely due to our extensive proactive precautions, we still have set mitigation techniques in place. If unauthorized access is given to an attacker, we immediately rotate any credentials and ensure to lock any current users out. To mitigate risk, we always ensure the associated host has backups. In the event that this happens to an AWS account, the access point is disabled and the credentials are rotated. Most “successful” attacks on an AWS account are not strong enough to be malicious, as we enforce MFA and keyless policies which are designed to deny attackers access even if they have gathered valid credentials for the account, while still permitting your application and staff to have all of the necessary access. Our AWS accounts also have automatic backups for S3 (file storage), RDS (database), and EC2 (server), which require special permissions to delete or restore.

COMPLIANCE AND SECURITY

GENERAL COMPLIANCE

For most data storage purposes, we utilize AWS, which provides tools to ensure, maintain, and monitor compliance with data security regulations. We even have an SOC 2 security certification. While many acts do not apply to most projects, we still strive to provide the best possible data security in every situation. This includes but is not limited to:

- HIPAA
- GDPR
- COPPA
- GLBA
- FTC act

'COREPHP' SECURITY STANDARDS

» AWS Proactive Cybersecurity and Cost Mitigation

At 'corePHP', we provide professionally tailored recurring reports where applicable to keep our clients informed about system performance and security. For IAM (Identity and Access Management), we ensure access is managed effectively to prevent unauthorized system entry. With EC2 (Elastic Compute Cloud), we focus on optimizing costs and maintaining robust security groups. For S3 (Simple Storage Service), we ensure regular, validated backups and secure sensitive data. We deploy WAF (Web Application Firewall) to block suspicious activity before it becomes a threat, and we uphold the integrity of data and application backups with comprehensive backup management. Using AWS GuardDuty, we identify and sort potential threats and vulnerabilities. Additionally, we monitor account activity to enforce the principle of least privilege (PLP) and utilize best practices to ensure optimal AWS security and performance.

» Secure Hosting

At 'corePHP', we offer secure hosting solutions backed by our SOC 2 Security certification, ensuring compliance with the highest industry standards. This certification demonstrates our commitment to safeguarding your data and providing a reliable, secure environment for your applications and services.

USER-FRIENDLY STANDARDS

We prioritize fostering opportunities for client feedback and consistently provide detailed reports on the project's current status. To facilitate this, we schedule dedicated meetings and assign personnel specially trained to ensure seamless communication. The frequency of these meetings is tailored to the project's requirements and the client's preferences, as we recognize communication strategies should be as unique as each project per the client's needs.

TEAM TRAINING

At 'corePHP', we ensure our clients can seamlessly adopt and use all solutions we build. Our training process includes creating custom training videos tailored to the specific needs of the client's team, scheduling virtual training sessions as necessary for hands-on learning, and providing detailed documentation to ensure ongoing usability. We also offer follow-ups to address any challenges and reinforce understanding, ensuring the client's staff is fully equipped to maximize the value of their AI solutions. As required, we also provide onsite training.

SCALABILITY AND CONTINUOUS IMPROVEMENT

We thoughtfully design and assess our choices for out-of-the-box and custom solutions, such as APIs and pre-trained models, to ensure they are highly scalable beyond the project's immediate requirements. These solutions are both robust and modular, allowing for swift and secure implementation of future updates. For instance, when working with APIs, we often create custom API wrappers using AWS Lambda, enabling the versioning and code to remain independent of the main application for easier updating. For solutions focusing on consumer-facing visual components, we typically also utilize separate servers and embedded content (iframes). This approach ensures that each environment remains distinct and fully modular, allowing granular adjustments to be made safely and efficiently while providing extended long-term support when compared to conventional workflows.

PRICING

Our pricing structure is based on a fixed hourly rate of \$160 per hour, designed to be simple to understand, affordable within the AI space to stay competitive, and still deliver high-quality results. This approach ensures pricing remains predictable and manageable.

PROPOSED VALUE-ADD

We are excited to offer two additional perks designed to add significant value for our clients:

First, with any paid contract, we provide a free, comprehensive SEO (Search Engine Optimization) audit. This audit is a deep dive into your website's performance in search engine rankings, helping you understand its strengths and weaknesses. By identifying key areas for improvement, the audit empowers you to make informed decisions to optimize your site and ensure it ranks favorably compared to competitors. This service is invaluable in boosting your online visibility and attracting more organic traffic.

Second, for clients looking to switch their hosting provider to us, we offer free migration services. Transitioning your website to a new host can often be daunting, but our expert team will handle the entire migration process seamlessly, ensuring minimal downtime and no data loss. Furthermore, we *guarantee* to either match or beat your current hosting provider's pricing, making the switch not only hassle-free but also financially advantageous.

These perks are part of our commitment to delivering exceptional service and value, ensuring our clients are well-supported in achieving their digital goals.
