

Tab F: Proposal Pricing

One of the primary tenants at BlueModus is our commitment to transparency. Our clients must know where their budget is spent and by whom. To ensure this, we have a Time & Materials pricing model for our clients and commit to weekly budget updates on all tasks.

Because our team does not include overseas or junior level colleagues, we also use a flat-rate hourly model. All BlueModus colleagues are available for our clients at the same rate – which drastically cuts down on project and budget management and ensures we can bring the right colleague to help – including our CTO, CSO or Development Directors.

For NCTCOG, our flat, hourly rate will be \$200.
