- 1.1 This Agreement defines the terms and conditions upon which the Contractor agrees to provide Executive Search Consulting and Related Services, (hereinafter, “Services”) to governmental entities participating in the TXShare program (hereinafter “Participating Entities”). The Contractor is being retained to provide services described below to Participating Entities based on the Contractor’s demonstrated competence and requisite qualifications to perform the scope of the services described herein and in the Request for Proposals #2025-003 (hereinafter, “RFP”). In the event of a conflict between this Agreement and the RFP, this Agreement will prevail. The Contractor demonstrated they have the resources, experience, and qualifications to perform the services described, which is of interest to Participating Entities and was procured via the RFP. ARTICLE II

- 2.3 Any agreed-upon changes to a Purchase Order shall be set forth in a subsequent Purchase Order amendment. Contractor will not implement any changes, or any new Services until a Purchase Order has been duly executed by the Participating Entity. For the avoidance of doubt, the Contractor acknowledges that Participating Entity is under no obligation to execute

a Purchase Order. Participating Entity shall not be liable for any amounts not included in a Purchase Order in the absence of a fully executed amendment of Purchase Order.

This Agreement will automatically be renewed, unless NCTCOG explicitly desires otherwise, for up to three additional years, through **January 31, 2030**.

3.2 **Termination.** NCTCOG and/or Participating Entities may terminate this Agreement and/or any Purchase Order to which it is a signatory at any time, with or without cause, upon thirty (30) days' prior written notice to Contractor. Upon its receipt of notice of termination of this Agreement or Purchase Order, Contractor shall follow any instructions of NCTCOG respecting work stoppage. Contractor shall cooperate with NCTCOG and/or Participating Entities to provide for an orderly conclusion of the Services. Contractor shall use its best efforts to minimize the amount of any non-cancelable obligations and shall assign any contracts related thereto to NCTCOG or Participating Entity at its request. If NCTCOG or Participating Entity elects to continue any activities underlying a terminated Purchase Order after termination, Contractor shall cooperate with NCTCOG or Participating Entity to provide for an orderly transfer of Contractor's responsibilities with respect to such Purchase Order to NCTCOG or Participating Entity. Upon the effective date of any such termination, the Contractor shall submit a final invoice for payment in accordance with Article IV, and NCTCOG or Participating Entity shall pay such amounts as are due to Contractor through the effective date of termination. NCTCOG or Participating Entity shall only be liable for payment of services rendered before the effective date of termination. If Agreement is terminated, certain reporting requirements identified in this Agreement shall survive termination of this Agreement.

ARTICLE IV COMPENSATION

- 4.1 **Invoices.** Contractor shall submit an invoice to the ordering Participating Entity in accordance with billing terms as stated in Appendix A for each Scope of Service. There shall be no obligation whatsoever to pay for performance of this Agreement from the monies of the NCTCOG or Participating Entities, other than from the monies designated for this Agreement and/or executed Purchase Order. Contractor expressly agrees that NCTCOG shall not be liable, financial or otherwise, for Services provided to Participating Entities.

- 4.2 **Reporting.** NCTCOG intends to make this Agreement available to other governmental entities through its TXShare cooperative purchasing program. ARTICLE V SERVICE FEE

- 5.1 **Explanation.** NCTCOG will make this Master Service Agreement available to other governmental entities, Participating Entities, and non-profit agencies in Texas and the rest of the United States through its TXShare cooperative purchasing program. The Contractor is able to market the Services under this Agreement to any Participating Entity with emphasis that competitive solicitation is not required when the Participating Entity purchases off of a cooperative purchasing program such as TXShare. However, each Participating Entity will make the decision that it feels is in compliance with its own purchasing requirements. The Contractor realizes substantial efficiencies through their ability to offer pricing through the TXShare Cooperative and that will increase the sales opportunities as well as reduce the need to repeatedly respond to Participating Entities' Requests for Proposals. From these efficiencies, Contractor will pay an administrative fee to TXShare calculated as a percentage of sales processed through the TXShare Master Services Agreement. This administrative fee is not an added cost to TXShare participants. This administrative fee covers the costs of solicitation of the contract, marketing and facilitation, as well as offsets expenses incurred by TXShare.
- 5.2 **Administrative Fee.** NCTCOG will utilize an administrative fee, in the form of a percent of cost that will apply to all contracts between awarded contractors and NCTCOG or participants resulting from this solicitation. The administrative fee will be remitted by the Contractor to NCTCOG on a quarterly basis, along with required quarterly reporting. The remuneration fee for this program will be 2% on all fees for service, with the exception of expenses that are passed through to Participating Entities without markup from the Contractor, such as, but not limited to, advertising, travel expenses and per diem costs, temporary housing, and materials production.

A.2 Why Our Customers Choose Us

HQE Systems, Inc. (HQE) is a FEMA-Certified Service-Disabled Veteran Owned Small Business (SDVOSB) with its global headquarters in Temecula, California. HQE was founded by service-disabled veterans who wanted to continue to serve our communities after honorably serving in the military. For a short period, the founders of HQE worked as Subject Matter Experts (SMEs) for our nation's largest technology companies. With the work ethics sharpened in the military and the technical knowledge gained from working in large technology companies, the founders of HQE decided to open its doors officially in 2014. Since then, HQE has grown to become an internationally recognized full-service technology company servicing over 1,000+ sites worldwide.

The value of HQE goes beyond just our technically superior offer and price. Since 2014, we have continued to solve problems for our clients through innovative software development and systems integration. Any company can offer a piece of equipment and install it. That’s the easy part. However, very few are capable of integrating legacy technologies with modern systems. Ultimately, our new customers always become our longtime customers due to our ability to solve problems others won’t touch. We solve problems!

E.1 HQE's Proposed Management Software Solution: SiSA

The **SiRcom SMART Alert System ("SiSA")** offered to NCTCOG is the world's SMARTEST agile mass notification software that will meet or exceed your requirements.

SiSA is deployable for immediate coverage for your organization with no limitations.

- ❖ **Unlimited Deployment Capable**
 - SiRcom has currently deployed to all levels of the Government & Dept. of Defense.
- ❖ **Most Secure Alerting Software**
 - SiRcom's Advanced Encryption Security was developed to the Department of Defense standards which utilize the Advanced 256BIT AES security protocols.
- ❖ **Unlimited Scalability**
 - SiRcom's core backbone was written with Deep Machine Learning Algorithms with components of the software that are capable of supporting an unlimited number of users, locations, and systems integration for management.
- ❖ **Fully Compliant and Certified Software**
 - SiRcom's security, data protection policies, and control measures are based on the Federal Information Security Management Act (FISMA) risk management and mitigation framework that is defined by the National Institute of Standards and Technology (NIST). SiRcom is assessed and inspected by a 3rd Party Assessment Organization and holds current certifications for SysTrust Statement on Standards for Attestation Engagements and Service Operations Controls SOC2 and SOC3.

SiSA Can Integrate All Of Your Life Safety & Security Systems Into A Single Portal

SiSA Will Work With All Your Current & Future Systems: (Below) SiSA can integrate all your existing or future 3rd Party Hardware and Software systems into SiSA’s single management portal. This integration capability allows any organization of any size to increase the efficiency and overall effectiveness of its life safety and security system. (Note: The information below is offered for information purposes only as the proposed solution for this project is focused on electronic notifications only.) However, to include the hardware integrations, HQE is capable of providing this integration solution at any time in the future.

SiSA is currently integrated with over 100+ life safety and security systems worldwide, from highly sophisticated Department of Defense systems to simple fire alarms. Our limitless integration capabilities are achievable because SiSA was developed with Deep Machine Learning Algorithms and has an Application Programming Interface (API) that will seamlessly integrate all 3rd party systems.

We understand that sometimes 3rd party software and hardware systems don’t have or won’t be provided with an API. Do not worry. HQE’s in-house software and systems integration engineers can provide a solution and a workaround option to help you modernize your legacy systems while leveraging SiSA as your emergency alert system. In addition, SiSA can automate all of your database management to ensure that your alerts are sent to your latest recipients list in your database software.

Note: Above depicts other alerting options not included in this proposal (i.e. PA Systems, Outdoor Sirens, Desktop Alerts, etc.)

E.2 HQE's Proposed Gunshot Detection Sensor

The outdoor wireless gunshot sensor by Technology being offered to NCTCOGn operates with precision, combining energy capture, waveform analysis, and seamless transmission of data to the Emergency Automatic Gunshot Detection & Lockdown System, constituting a robust Gunshot Detection System (GDS). This compact, self-contained sensor is battery-operated and employs advanced energy waveform algorithms for threat versus non-threat validation analysis. Housed within a resonance chamber, it offers versatile mounting options on flat walls, corners, or poles, ensuring an optimal spherical detection coverage area of approximately 785,398 square feet. The sensor's communication capabilities, utilizing either LoRa or IoT based on application requirements, enable effective wireless transmission of threat validation data to the System Server via internal Quectel. Upon reception, the System Server processes the data, triggering pre-programmed automatic and autonomous Adaptive Response features. Additionally, the sensor receives calibration data from the Server, establishing a comprehensive and integrated approach to gunshot detection and response.

❖ Gunshot Detection

EAGL's patented Talon and sensors use waveform analysis to measure the energy levels produced during a gunshot. If the initial validation confirms a gunshot, the collected waveform data is then sent to the server for additional analysis using sophisticated algorithms.

❖ Analysis

If the sensors confirm a detection event as a potential threat, it undergoes a second round of analysis on the server for additional validation. If this second step yields positive results, indicating a gunshot, the server enters an alarm state, triggering the initiation of the Adaptive Response.

❖ Response

Upon alarm, the SiRcom SMART Alert server launches a series of response actions that can include:

- 911 Dispatch ➤ Email/Text ➤ Phone calls ➤ ACS Integration
- CCTV Integration ➤ Relay Outputs ➤ 3rd Party API Integration ➤ PA System

❖ Installation Solution

The sensors can be mounted on poles or building exteriors, establishing a wireless communication network between each sensor and the central server. This wireless setup, combined with a built-in solar-powered battery backup, offers NCTCOGn a fully wireless solution that demands minimal infrastructure and maintenance.

*“Your wish for more time,
has been granted.”*

During an active shooter event, it takes about 5 minutes before the first call to 911.

On average one life is lost for every 15 seconds an active shooter continues their rampage.

Do the math.

By using EAGL’s Emergency Automation, your call arrives at the 911 center in seconds, not minutes, without user delay.

Saving time and lives.

The Automation platform can automate your emergency response plans, for any emergency, allowing vital information to be delivered in seconds not only to law enforcement, but to everyone who needs it, in any format of your choosing: Text, Email, or Voice Call. The platform allows you to lock down doors and has the capability to activate other “obstacles” to slow down the “bad” and afford everyone more time to get safe, or to confront the issue. The system can deliver, to any browser-based device, the tools needed by those who arrive to help. Giving simple, ad-hock, access to satellite imagery and live visual alarms, along with real-time camera access, detailed floor maps, door lock access, and real-time situational awareness.

Automation Saves Time.

Saving Time, Saves Lives!

At the core of the Automation Platform is our patented Adaptive Response, which allows you to create custom automations very quickly and easily within the system.

Our simple to navigate web-based platform allows an authorized user to set up anything from a simple response automation: such as locking a door; to a more complex one: such as locking doors, turning off fire alarm bells, sending multiple notifications, making announcements, E911, etc. Any user can intuitively use this interface to simply click and select within its options on the Adaptive Response webpage, greatly reducing their time and effort to create Automation Scenarios while being assured they will function as intended.

For every input/activation point configured into the Automation Platform you have multiple options that can be automated within the Adaptive Response. These options include:

- Multiple Email and Text groups
- Custom Message Additions
- Automated Network Controlled Relays
- Local Server Address
- Public address or phone system-based audio announcements using the included text-to-speech engine or pre-recorded messages.
- Voice calls to multiple users with custom message.
- Alarm Post to multiple endpoints (API Based)
- VMS/EMS Direct Integration
- E911 Option
- Multi-user conference calling
- Lockdowns (one or many doors)
- Digital Floor Map Delivery
- Satellite Map with live alarms
- Multiple camera live access

Inputs and Sensor Options:

The platform can use multiple devices and choices to activate emergency automation. These choices can include, but are not limited to, hard connections such as a relay contact, Sensors, and soft or “Snap-in” connections. Any of these options can be used alone, or alongside others, in an Adaptive Response automation scenario. This allows highly effective and targeted automations for any situation. Sensor can include any of our wireless sensors:

- Indoor Talon Gunshot Sensor
- Outdoor Extreme Sensors
- Body Worn Gunshot and Man-Down sensor.
- Panic/Duress/Safe Buttons
- Panic/Pull Stations
- Vape Sensor
- In-Vehicle sensor
- Smart Phone Safe App

Soft Connection and “Snap-Ins”:

- Weapons Detection
- Fight Detection
- Intruder Detection
- Suspicious behavior
- Facial Recognition
- License Plate Recognition
- Smoke/Fire
- Slip and Fall
- Etc.

As well as hardwired/Contact based inputs from any other system or solution.
